The 64 x 640 network input, with the sampled position marked

input patch X (ink positive)

-1.000	-1.000	-1.000
-0.553	-0.380	-0.569
+0.867	+0.961	+0.867

learned kernel W (channel 0)

+0.213	-0.215	+0.234
+0.068	-0.083	+0.187
-0.312	-0.291	-0.221

elementwise $W \odot X$

-0.213	+0.215	-0.234
-0.038	-0.032	-0.107
-0.271	-0.280	-0.192

$\Sigma\, W \odot X = -1.150897$
bias $b = -0.000435$
$z = -1.151332$

batch norm, stored statistics

$\mu = 0.2163021$ $\sigma^2 = 0.02585394$
$\gamma = 1.0193636$ $\beta = 0.1324657$
$y = -8.53619$

$\mathrm{ReLU}(y) = 0.00000$
