
The convolutional stack on one real line, three strongest channels per stage
input
1 × 64 × 640
cols 0–320
cols 320–640
stage 1 out
32 × 64 × 640
after pool
32 × 32 × 320
stage 2 out
64 × 32 × 320
after pool
64 × 16 × 160
stage 3 out
128 × 16 × 160
maximum over the remaining height, 128 × 16 × 160 → 128 × 1 × 160:
height is discarded and width becomes the CTC time axis
channel
